

SALT-X AUTO-MIX UNIT OPERATING INSTRUCTIONS

The **AUTO-MIX UNIT** is designed for use with **SALT-X** to flush salt deposits from inside engines and for rinsing down larger areas such as boats, trailers, vehicles, homes, etc. The **AUTO-MIX UNIT** is made of brass for durability and is easy to use. The **AUTO-MIX UNIT** works with any garden hose. We recommend using a hose that is from 25 feet to 50 feet in length. The advantage of the **AUTO-MIX UNIT** over hose end units is that the **AUTO-MIX UNIT** gives a CONSTANT FLOW of 2 ounces of **SALT-X** per gallon of water! Hose end units are prone to emptying the chemical cup quickly and then allowing only fresh water to run through your hose.

DIRECTIONS FOR USE: Attach the **AUTO-MIX UNIT** directly to the faucet and attach your garden hose to the **AUTO-MIX UNIT**. Drop the clear siphon hose into your container of **SALT-X**, attach a spray nozzle or motor flush unit to the end of your garden hose and you are ready to use **SALT-X** for flushing your boat engine or rinsing down larger areas.

FOR USE WITH MOTOR FLUSH UNITS: After following above directions, attach motor flush unit to outboard engine or out drive per manufacturers directions. Turn water on first and then start engine. Run engine on FAST IDLE for 15 to 30 seconds after water starts coming out water exhaust port solution will be slightly sudsy. Shut off motor and then shut off water source. If your engine does not need to be running for flushing, or you are flushing trailer brakes or personal water craft, follow directions for flushing, only have **AUTO-MIX UNIT** hooked up to run **SALT-X** through engine.

FOR USE ON BOATS, BOAT TRAILERS, VEHICLES, HOUSES, MOTOR/MOBILE HOMES, ETC: Attach standard nozzle to garden hose after connecting **AUTO-MIX UNIT** to faucet per above instructions. Using a WIDE ANGLE spray, rinse all surfaces THOROUGHLY starting at the top and working your way down. Make sure to get undersides of all vehicles and equipment. The uniqueness of the **AUTO-MIX UNIT** means that ANY direction the nozzle is turned; you will be applying the proper dilution of **SALT-X** to the surface! Use **SALT-X** every time your equipment comes in contact with salt or saltwater, OR, on periodic basis as part of a preventive maintenance program for your vehicle, motor/mobile home, boat/trailer, etc. **SALT-X** and the **AUTO-MIX UNIT** are EXCELLENT for use after coastal storms for rinsing down HOMES, MOTELS, AIR CONDITIONERS, etc. to remove salt buildup.

The **AUTO-MIX UNIT** has an automatic safety valve to prevent chemicals from sucking back into the water system. Clean unit after each use with clear water to keep metering tip clear and properly working. Do NOT disassemble unit.

ORDERING: Order your **AUTOMIX-UNIT** online at www.saltx.com or call us at 540-720-8400.

NOTE: PLEASE SPECIFY SALT-X UNIT WHEN RE-ORDERING!
